CLICHA Project

CLimate CHange in Agriculture (CLICHA) is designed, under the general aim of building capacity in the field of higher education, in order to modernize, to improve accessibility and internationalization of higher education in the Partner Country considering all necessary skills for sustainable agriculture, respectful of the environment and climate change resilience.

Based on good practices used by the project partners, the project will contribute to improve educational programs and consequently skills of graduates to cope with climate change, mainly mitigation, resilience and adaptation.

Specific Objectives

The objectives of this project are the assessment of the educational programs of the Tunisian HEIs in relation with CC; the creation of the necessary cognitive materials; the improvement of the training curricula; the partial putting on line of some modules and the instruction of accreditation process within each Tunisian HEI; the enhancement of HEIs-enterprises cooperation.

The achievement of these objectives will be possible through the exchange of expertise and good practices within consortium partners.

Expected Results

- ✓Development and use of new and updated material in the field of "Climate Change, crop, water and animal production" in two languages;
- ✓Development of the relevant courses;
- ✓Setting up of modern learning equipment (educational and equipment related to the delivery of the courses);
- ✓Design of learning tools (e-learning platform, dynamic web site), that will all contribute to the achievement of the project's wider objective;
- ✓Process of accreditation framework for at least one educational program for each Tunisian HEI.
