of the European Union

Hybrid event

Final Congress

The renovation of agronomic studies is required in a context of globalization and employment mobility. Numeric pedagogy and ICT are precious to develop international programs in agriculture and climate change. In this context, a final conference "Climate Change in Agriculture" takes place in the **Higher Agronomic Institute of Chott Mariem** (University of Sousse) for an overview of the courses delivered in Tunisian Higher Education Institutions (UJ-ESIM, UCar-INAT, USo-ISA-CM).
